

PROCLAMATION
HUNTINGTON DISEASE AWARENESS MONTH
May 2023

- WHEREAS: Huntington disease (HD) is a hereditary, neurodegenerative illness with physical, cognitive and emotional symptoms for which there is no cure; and
- WHEREAS: one in every 7,000 Canadians has HD and approximately one in every 5,500 is at-risk for developing the disease. Many more are touched by HD as a caregiver, family member, or friend; and

HSC celebrates the resilience and hope demonstrated by the HD community. HSC aims to maximize the quality of life of people living with HD by delivering support services; enabling others to understand the disease; and supporting further breakthroughs in research to find treatments that address the root cause of HD; and
- WHEREAS: HSC works with health and social services professionals to enable them to better serve people living with HD; and
- WHEREAS: HSC is a respected leader in the worldwide effort to end Huntington disease. HSC is the only national health charity dedicated to providing help and hope for families dealing with HD across Canada.
