City reminds developers to prepare job sites for heavy rain

Summary

With heavy rain forecast this weekend, the City of Nanaimo is reminding developers to ready their job sites for the risk of erosion. To be included with any preparations is the correct installation and maintenance of erosion and sediment control measures. For more information, click on the link provided in the online version of this news release.

Strategic Link: Taking responsibility to be an excellent municipal government.

Key Points

- For Saturday, Environment Canada has issued a heavy rain alert for East Vancouver Island.
- Erosion and sediment control measures are a required element of all job sites. Local developers should take steps to ensure all necessary resources are in place leading up to this weekend's rain.

Quotes

"Erosion debris created during heavy rainfall presents challenges to surrounding properties as well as City infrastructure, including drains and storm sewers. We're asking developers to plan for rain by checking their erosion and sediment control measures."
