Unbalanced Submission and Discrepancies

Submissions that contain prices which appear to be so unbalanced as likely to adversely affect the interests of the City may be rejected.

Wherever the amount bid for an item does not agree with the extension of the Submission quantity and the bid unit price, the unit price shall govern the amount and the total bid price shall be corrected accordingly.

Mathematical discrepancies will be corrected by the City by appropriate means to arrive at the correct total Submission price. Where an error has been made in transferring an amount from one part of the Submission to another, the amount shown before transfer shall, subject to any corrections as provided for above, be taken to be correct, and the amount shown after transfer and the total bid price shall be corrected accordingly.
