

CONSTRUCTION NOTICE

Dickinson Road Watermain & PRV Upgrade

July 8, 2025

Windley Contracting, on behalf of the City of Nanaimo, will start construction next month on a watermain and pressure relief valve (PRV) station upgrade project on Dickinson Road, between Groveland Drive and Schook Road. This work is part of the City's 2025 Capital Projects Infrastructure Improvements.

To assist with installation of the new watermain and PRV station, temporary lane road closures will be necessary. Access to all residential properties shall be maintained at all times (including Medd Rd & Ellen Pl). Typical work hours will be Monday to Friday, 7am - 7pm. Construction signs will be posted and flag persons are on duty to assist with the traffic flow. Please exercise caution, obey all signage placed for your safety, and follow the directions of the flag persons on duty. We ask local residents to please help us communicate these temporary impacts to your visitors and delivery drivers. To avoid the construction works use Schook Road or Lantzville Road.

Construction is expected to last until late September. Once complete, this watermain and PRV improvement will provide a clean, safe and reliable water supply to residents and improve water pressure.
