

**BC ENERGY COMPLIANCE REPORT - PERFORMANCE PATHS FOR PART 9 BUILDINGS**

Revised July 12, 2021

For Buildings Complying with Subsection 9.36.5. or 9.36.6. of the 2018 BC Building Code (see BCBC Article 2.2.8.3. of Division C)

**A: PROJECT INFORMATION**

<b>Building Permit #:</b>	<input type="text"/>	<b>Building Type:</b>	<input type="text" value="Select One"/> ▾
<b>Builder:</b>	<input type="text"/>	<b>If Other, Please Specify:</b>	<input type="text"/>
<b>Project Address:</b>	<input type="text"/>	<b>Number of Dwelling Units</b>	<input type="text"/>
<b>Municipality / District:</b>	<input type="text"/>	<b>Climate Zone:</b>	<input type="text" value="4"/> -
<b>Postal Code:</b>	<input type="text"/>	<b>Heating Degree Days:</b>	<input type="text"/>
<b>PID or Legal Description</b>	<input type="text"/>	<b>Floor Area of Conditioned Space (m<sup>2</sup>):</b>	<input type="text"/>

**BC Building Code Performance Compliance Path:**  
(Select boxes that apply)

- 9.36.6. **→** Complete Sections A, B, D, & E
- 9.36.5., NOT complying with Step Code **→** Complete Sections A, B, C, & E
- 9.36.5., complying with Step Code **→** Complete Sections A, B, C, D & E

**\*Building Type must be selected in both the Pre-construction Report AND in this As-built Report in order to auto populate this report correctly\***

Software Name:  Version  Climatic Data (Location):

**B: BUILDING CHARACTERISTICS SUMMARY** (see BCBC Clause 2.2.8.3.(2)(b) of C)

Details (Assembly / System Type / Fuel Type / Etc.)		Eff RSI , USI, SHGC, etc
Exterior Walls & Floor Headers	<input type="text"/>	Effective R <sub>SI</sub> <input type="text"/>
Roof / Ceilings	<input type="text"/>	Effective R <sub>SI</sub> <input type="text"/>
Foundation Walls, Headers, & Slabs	<input type="text"/>	Effective R <sub>SI</sub> <input type="text"/>
Slab Is: <input type="checkbox"/> Below <b>OR</b> <input type="checkbox"/> Above Frost Line   <input type="checkbox"/> Heated <b>OR</b> <input type="checkbox"/> Unheated		
Floors Over Unheated Spaces	<input type="text"/>	Effective R <sub>SI</sub> <input type="text"/>
Fenestration & Doors	<input type="text"/>	U <sub>SI</sub> <input type="text"/>
FDWR <input type="text"/> %		SHGC <input type="text"/>
Air Barrier System & Location	<input type="text"/>	<input type="text"/>
Space Conditioning (Heating & Cooling)	<input type="text"/>	% , HSPF, &/or SEER <input type="text"/>
Service Water Heating	<input type="text"/>	EF &/or % eff <input type="text"/>
Ventilation	<input type="text"/>	<input type="text"/>
Other Energy Impacting Features	<input type="text"/>	<input type="text"/>

Based on information provided by the builder, and a site evaluation completed on (YYYY/MM/DD):

**C: 9.36.5. ENERGY PERFORMANCE COMPLIANCE** (see BCBC Clause 2.2.8.3.(2)(c) of Division C)

Complete this section only if using the Energy Performance Compliance Path in Subsection 9.36.5.

Built House Rated Energy Consumption (GJ/year)		Reference House Rated Energy Target (GJ/year)	
HVAC		HVAC	
Hot Water Heating		Hot Water Heating	
<b>SUM</b>	-	<b>SUM</b>	-

Measured airtightness (as per BCBC 2018 Div C Clause 2.2.8.2.(1)(f)) \_\_\_\_\_ ACH @ 50Pa

The above calculation was performed in compliance with Subsection 9.36.5. of Division B:  Yes  No

**D: 9.36.6. ENERGY STEP CODE COMPLIANCE** (see BCBC Sentence 2.2.8.3.(3) of Division C)

Complete this section only if using the Energy Step Code Compliance Path in Subsection 9.36.6.

If using 9.36.5 to comply with 9.36.6, print and manually fill in the table below. The table below auto-fills from the calculator worksheets and the fields cannot be overwritten.

Rated Energy Consumption (GJ/year): As-Built House - Reference House - | HDD: 2,960.9

Metric	Units	Required	Proposed	As-Built
Step Code Level	Step 1, 2, 3, 4, or 5	1	1	1
Mechanical Energy Use Intensity (MEUI)	kWh/(m <sup>2</sup> ·year)	(max)		
ERS Rating % Lower Than EnerGuide Reference House, where applic	%	(min)		
Thermal Energy Demand Intensity (TEDI)	kWh/(m <sup>2</sup> ·year)	(max)		
Adjusted TEDI	kWh/(m <sup>2</sup> ·year)	(max)		
Building Envelope % Better	%	(max)		
Airtightness in Air Changes per Hour at 50 Pa differential	ACH @ 50 Pa	(max)		
<b>Step Code Design Requirements Met:</b>				

The above calculation was performed in compliance with (see BCBC Clause 2.2.8.3.(2)(e) of Division C)

Select one:

- Subsection 9.36.5.,
- The Passive House Planning Package (PHPP), version 9 or newer, and the energy model was prepared by a Certified Passive House Designer or Certified Passive House Consultant,
- The EnerGuide Rating System (ERS), version 15 or newer, or
- The applicable requirements of NECB Part 8 and the City of Vancouver Energy Modelling Guidelines.
- The "Instructions for Modelling Attached Ground Oriented Part 9 Residential Buildings" (found in Section 6 of the BC Energy Compliance Reports Instruction Manual)

		_____	_____
		_____	_____
		_____	_____

**Note:** The same Advisor will have different ID #s with different Service Organizations.

## SUPPLEMENTARY INFORMATION

Supplementary information is not required for Code Compliance but may be requested by the local municipality/district. Where applicable, all metrics within Section F are calculated with baseloads included. If required, complete the applicable sections below.

### F: OTHER ENERGY MODELLING METRICS

#	Metric	Units	Reference House	Proposed House	As-Built House
1	Airtightness NLA@10Pa	cm <sup>2</sup> /m <sup>2</sup>			
2	Rated Greenhouse Gas Emissions	kg/year			
3	Rated Greenhouse Gas Intensity	kg/m <sup>2</sup> /year	-	-	-
4	Rated Energy Use Intensity	GJ/m <sup>2</sup> /year	-	-	-
5	Peak Thermal Load (PTL)	W/m <sup>2</sup>	-	-	-
6	% of the Building's Conditioned Space Served by Space-Cooling	%	N/A	-	-
7	% Lower Than Reference House With Baseloads Included	%	N/A	-	-

#	Energy Source	Reference House Energy Consumption (GJ/year)	Proposed House Energy Consumption (GJ/year)	As-Built House Energy Consumption (GJ/year)
8	Electricity	-	-	-
	Natural Gas	-	-	-
	Propane	-	-	-
	District Energy	N/A	-	-
	On-Site Renewables	N/A	-	-
	Other:	-	-	-
	<b>Total</b>	-	-	-
