9.3 DENSITY

- 9.3.1 The following table specifies the maximum allowable base density, expressed as a Floor Area Ratio, per lot for each zone. The additional density columns permit additional density where the following specified location and amenity criteria have been provided. Additional density where achievable is applied during the development permit process. Within mixed use development, additional density may be awarded where the lot includes both commercial and residential uses. Tier 1 awards additional density where a development meets or exceeds the Tier 1 requirements, as specified within “Schedule D – Amenity Requirements for Additional Density” of this bylaw; Tier 2 awards additional density to a development which meets or exceeds the Tier 2 requirements within Schedule D. Where a development achieves additional density, the additional floor area may be added to the base density within the zone. A development may achieve all of the additional density available within the zone:

Zone	Maximum Allowable Floor Area Ratio (FAR)	Additional Density		
		Mixed Use*	Tier 1	Tier 2
COR1**	1.00	N/A	+0.25	+0.25
COR2	1.25	N/A	+0.25	+0.25

10.3 DENSITY

10.3.1 The following table specifies the maximum allowable base density, expressed as a Floor Area Ratio, per lot for each zone. The additional density columns permit additional density where the following specified location and amenity criteria have been provided. Additional density where achievable is applied during the development permit process. Within mixed use development, additional density may be awarded where the lot includes both commercial and residential uses. Tier 1 awards additional density where a development meets or exceeds the Tier 1 requirements, as specified within “Schedule D – Amenity Requirements for Additional Density” of this bylaw; Tier 2 awards additional density to a development which meets or exceeds the Tier 2 requirements within Schedule D. Where a development achieves additional density, the additional floor area may be added to the base density within the zone. A development may achieve all of the additional density available within the zone:

Zone	Maximum Allowable Floor Area Ratio (FAR)	Additional Density		
		Mixed Use*	Tier 1	Tier 2
CC1	0.45	N/A	N/A	N/A

Exhibit 3 “Concept Plan” illustrates how Northbrook Centre is intended to be a mixed-use development comprised of three high and medium rise residential areas where surrounded by broken line, adjoining and connected to a low rise local “Village” shopping centre with a low rise office component and with well landscaped open areas between buildings.

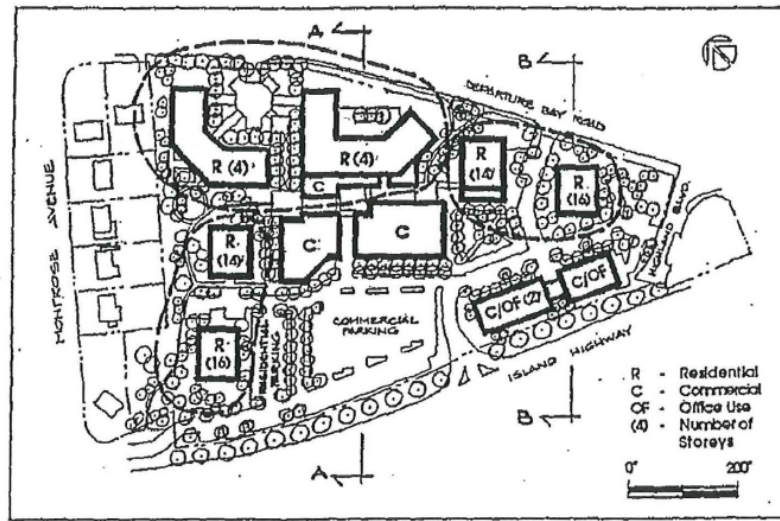

Exhibit 3

8. Exhibit 4 "Concept Sections and Elevations" illustrates the concept of the three high and medium rise residential enclaves described in Exhibit 3 in the vertical dimension and the height requirements. The height of the residential towers will not exceed a maximum height of 150'-0" and will vary between 14 and 16 storeys. Height restrictions imposed in this zone on buildings do not apply to peaked roofs, towers, turrets, or other architectural features which do not contain habitable living space or other space intended for any use or occupancy. Tops of high rise buildings will be designed to create more interesting forms than flat box shapes.

It also prescribes required minimum distances between buildings and minimum setback distances between buildings, lot line, or other features and maximum building floor plates.

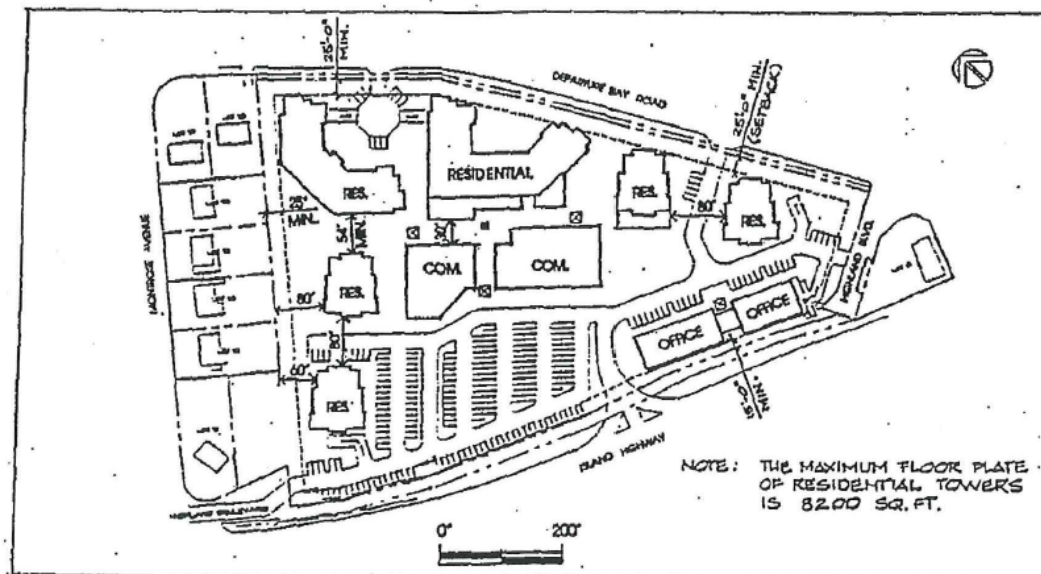

Exhibit 5

10. Exhibit 6 "Neighbourliness" establishes a number of elements of the scheme which are designed to improve the neighbourliness of the concept to adjacent properties and streets and prescribes the type of landscaping and screening necessary to screen the commercial uses of Northbrook Centre from existing residential development along Montrose Avenue.

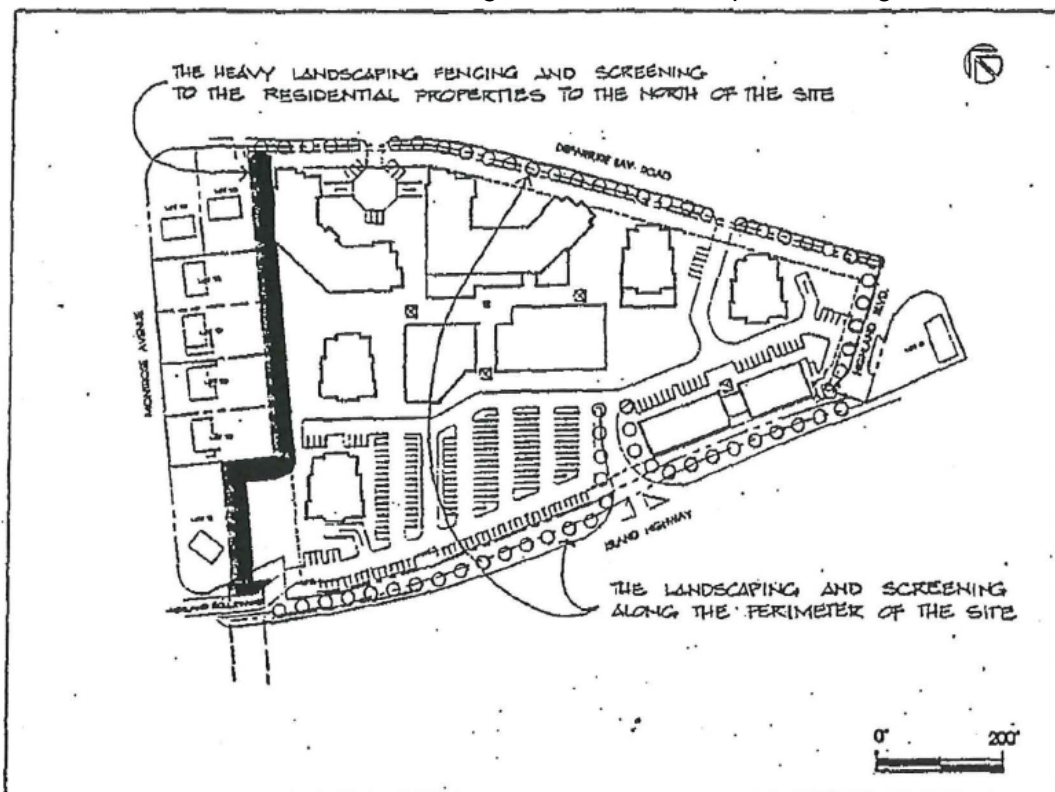

Exhibit 6

11. Exhibit 7 "Vehicle Access" prescribes the location of vehicle access points to Northbrook Centre from adjacent public streets, and access for fire trucks and other emergency vehicles.

Exhibits 11 and 12 show the subsequent plans in one potential sequence. However, as long as the complete site is always adequately laid out and landscaped, the phasing may vary, so that phases could occur in any order after Phase 1.

Exhibit 9

14. Exhibit 10 “Phase 1 Concept” shows the whole of the Northbrook Centre as it will appear at the end of the first phase of development.

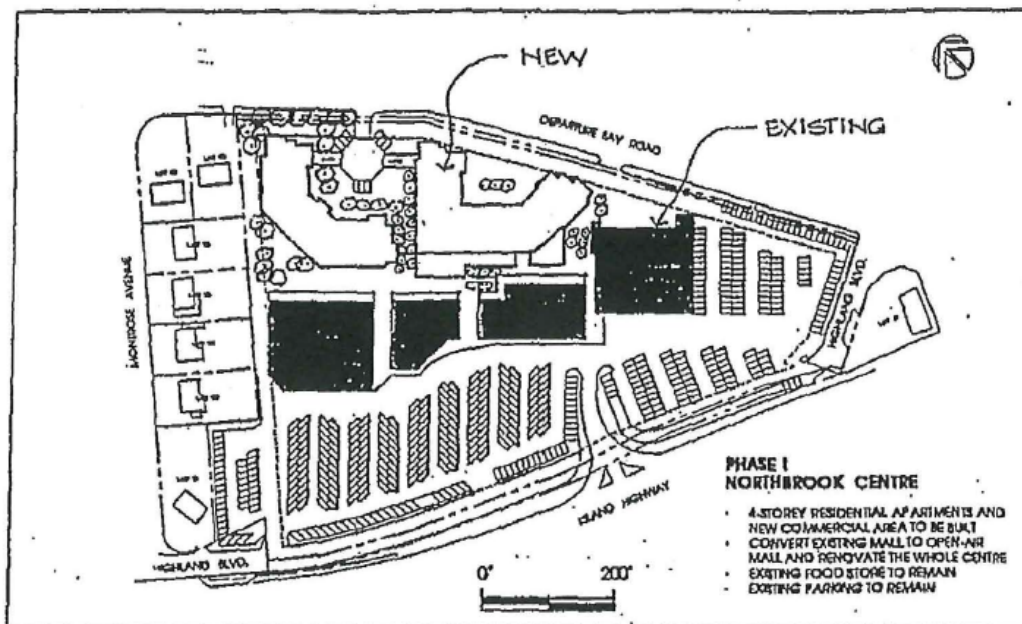

Exhibit 10

15. Exhibit 11 “Phase II Concept” shows the whole of the Northbrook Centre as it will appear at the end of the second phase of development.

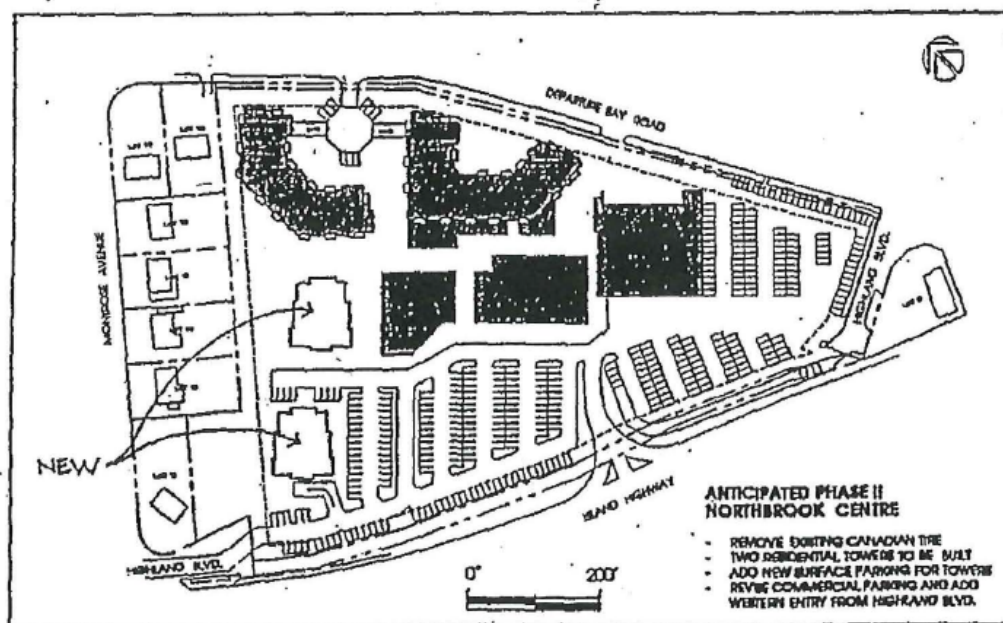

Exhibit 11

16. Exhibit 12 “Phase III Concept” shows the whole of the Northbrook Centre as it will appear at the end of the third phase of development.

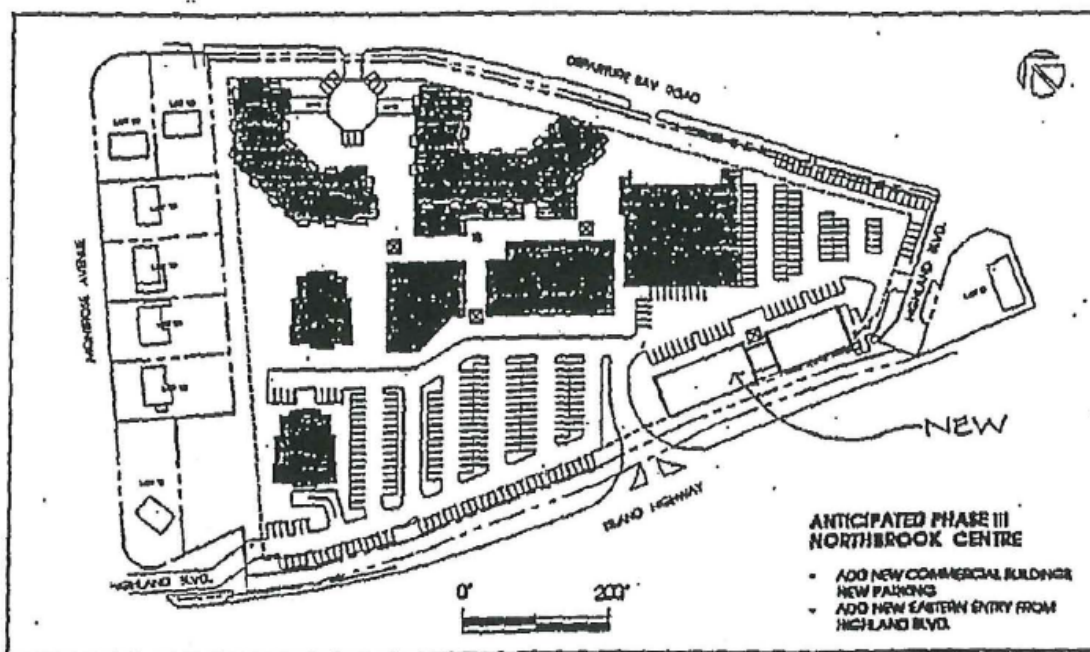

Exhibit 12

17. Exhibit 3 “Concept Plan” shows the complete development. Phase IV development will require removing the existing food store, building the two remaining residential towers and a “Village Green” as well as adding new surface parking for the towers and a new entry from Departure Bay Road.

18. Exhibit 13 “Sound Attenuation” prescribes the noise levels that shall not be exceeded for each component of the residential parts of the development. The noise level shown is based on the A-weighted 24 hour equivalent (Leg) sound level and will be defined simply as noise levels in decibels.

PART 18 - DEVELOPMENT PERMIT AREA (DPA) GUIDELINES

18.1 DPA1: ENVIRONMENTALLY SENSITIVE AREA (ESA) GUIDELINES – WATERCOURSE, TERRESTRIAL & MARINE FORESHORE

Application

- 18.1.1 *Environmentally Sensitive Areas (ESAs)* are identified on “Schedule 6 – DPA1: Environmentally Sensitive Areas” of the *City Plan*.
- 18.1.2 A development permit is required prior to any proposed development in DPA1: Environmentally Sensitive Areas.
- 18.1.3 DPA1 applies to the following *ESAs*:
- a) Watercourse ESA
 - i. The width of the *Watercourse ESA leave strip* shall be determined as specified on Schedule 6 of the *City Plan*.
 - ii. The width of the *watercourse leave strip* is measured horizontally from, and at right angles to, the *top of bank* or *wetland boundary* of the *watercourse*.
 - b) Terrestrial ESA
 - i. Properties impacted by known Terrestrial *ESAs* are shown on Schedule 6 DPA1: *Environmentally Sensitive Areas* of the *City Plan*, and the width of the terrestrial *ESA leave strip* shall be determined by a *Qualified Registered Professional* through a detailed biophysical assessment and approved by the Director of Development Approvals.
 - c) Marine Foreshore ESA
 - i. Marine Foreshore *ESAs* are shown on Schedule 6 of the *City Plan*.

Guidelines

- 18.1.4 Where disturbance within an *ESA* or *ESA leave strip* cannot be avoided, the following information must be provided to support the DPA1 development permit application in order to ensure protection, connectivity and increased functional habitat through mitigation, compensation and restoration of the *ESA*:
- a) A detailed biophysical assessment of the property, prepared by a *Qualified Registered Professional*.
 - b) A survey, completed by a registered BC Land Surveyor, of the *ESA* and *ESA leave strip* area.
 - c) A *Riparian Areas Protection Regulation (RAPR)* assessment report prepared by a *Qualified Registered Professional* where applicable.
 - d) An assessment of the proposed development’s impact to the site hydrology completed by a *Qualified Registered Professional*.
 - e) An Executive Summary of the required strategy and recommended measures to protect the *ESA* prior to site disturbance, during the construction process and post

construction must be included in the *Qualified Registered Professional* assessment.

- f) A restoration and enhancement management plan and detailed cost estimate for any restoration works, prepared by a *Qualified Registered Professional*, for the disturbed portion of the *ESA* and *ESA leave strip*. The plan shall meet the following criteria:
