Skill Drill 12-1

Fire Fighter I, 4.3.9

Conducting a Primary Search Using the Standard Search Method					
Evaluator Instructions: The candidate shall be provided with PPE, SCBA, portable radio, flashlights, hand tools, ladders, and a structure deemed safe to conduct standard searches in. The skills for carries and drags should be applied during this skill drill.					
Task: Safely conducting a standard search of a building and rescuing any victims as part of a search team.					
Performance Outcome: The candidate shall assess for hazards, determine tenability of areas within the building, utilize hand tools for forcible entry, set up ladders to assist in rescue, and rescue any victims while conducting a standard search of a structure as part of a search team.					
Candidate Directive: “Safely conduct a standard search of a structure and rescue any victims with unobstructed vision as part of a search team.”					
No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	Don your personal protective equipment (PPE), including SCBA, and enter the personnel accountability system. Bring hand tools, a hand light, a radio, a thermal imaging device, and search ropes if indicated. Notify command that the search is starting, and indicate the area to be searched and the direction of the search. Use hand tools or ground ladders if needed to gain access to the site. Conduct a quick and systematic search by staying on an outside wall and searching from room to room. Maintain contact with an outside wall.				
2.	Maintain team integrity using visual, voice, or direct contact. Use the most efficient movement based on the hazard encountered: duck walk, crawl, stand only when you can see your feet and it is not hot. Use tools to extend your reach if recommended by your department. Clear each room visually or by touch, and then close the door. Search the area, including stairs up to the landing on the next floor.				
3.	Periodically listen for victims and sounds of fire. Communicate the locations of doors, windows, and inside corners to other team members. Observe fire, smoke, and heat conditions; update command on this information. Locate and remove victims; notify the IC. When the search is complete, conduct a personnel accountability report. Report the results of the search to your officer.

Fire Fighter I, 4.3.9

Conducting a Primary Search Using the Oriented Search Method

Evaluator Instructions: The candidate shall be provided with PPE, SCBA, portable radio, flashlights, hand tools, and a structure deemed safe to conduct oriented searches in. The skills for carries and drags should be applied during this skill drill.

Task: Safely conducting an oriented search of a building and rescuing any victims as part of a search team.

Performance Outcome: The candidate shall assess for hazards, determine tenability of areas within the building, utilize hand tools for forcible entry, and rescue any victims while conducting an oriented search of a structure as part of a search team.

Candidate Directive: “Safely conduct an oriented search of a structure and rescue any victims with unobstructed vision as part of a search team.”

No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	A search team consisting of one officer or team leader and one to three searchers is assembled.				
2.	Searchers don their personal protective equipment (PPE), including SCBA and hand tools, and enter the personnel accountability system.				
3.	The officer notifies the incident commander that search is starting and directs the searchers to the area to be searched.				
4.	The officer remains outside the rooms to be searched to monitor safety conditions, air supplies, and the status of the fire. The officer maintains a systematic search pattern and coordinates activities with the incident commander.				
5.	Searchers use a left-handed or a right-handed search pattern and perform two to three side crawls as necessary to extend the search towards the centre of the room. Upon completion of the search of each room, the officer directs searchers to the next rooms to be searched and closes the door. If a victim is found, the officer notifies the incident commander and requests a second team to help remove the victim. The search team moves the victim towards the exit and turns over the care and removal of the victim to the second team.				
6.	The search team then returns to the last location searched and continues the systematic search of the building. When the search is complete, the officer conducts a personnel accountability report. The officer reports the results of the search and the personnel accountability report to the incident commander.

Skill Drill 12-3
 Fire Fighter I, 4.3.9

Performing a Secondary Search

Evaluator Instructions: The candidate shall be provided with PPE, SCBA, portable radio, flashlights, hand tools, ladders, and a structure deemed safe to conduct secondary searches in. The skills for carries and drags can be applied during this skill drill. The candidate’s vision should be partially obstructed with theatrical smoke, darkness, or face piece. As compared to primary searches, conditions are better during secondary searches and the training environment should mimic this.

Task: Safely conducting a secondary search of a structure and rescuing any victims as part of a search team.

Performance Outcome: The candidate shall assess for hazards, determine tenability of areas within the building, utilize hand tools for forcible entry, set up ladders to assist in rescue, and rescue any victims while conducting a secondary search of a structure as part of a search team.

Candidate Directive: “Safely conduct a secondary search of a structure and rescue any victims as part of a search team.”

No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	Don PPE, including SCBA, and enter the personnel accountability system. <ul style="list-style-type: none"> Bring hand tools, a hand light, a radio, a thermal imaging device, and search ropes if indicated. Notify command that the search is starting, and indicate the area to be searched and the direction of the search. 				
2.	Conduct a systematic, thorough search for any possible victims. <ul style="list-style-type: none"> In addition to checking for victims, be alert for hidden fire, salvage needs, and indicators of the fire’s cause, its origin, or arson. Protect any evidence. Maintain team integrity using visual, voice, or direct contact. Notify command of the results of the search and personnel accountability report.

Performing a Two-Person Walking Assist					
Evaluator Instructions: The candidate shall be provided with a victim to assist and a partner.					
Task: Two-person walking assist.					
Performance Outcome: The candidate shall demonstrate the ability to safely assist a victim with walking.					
Candidate Directive: "Provide walking assistance with a partner to a victim."					
No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	Two fire fighters stand facing the victim, one on each side of the victim. Both fire fighters assist the victim to a standing position.				
2.	Once the victim is fully upright, place the victim's right arm around the neck of the fire fighter on the right side. Place the victim's left arm around the neck of the fire fighter on the left side. The victim's arms should drape over the fire fighters' shoulders. The fire fighters hold the victim's wrist in one hand.				
3.	Both fire fighters put their free arms around the victim's waist for added support. Both fire fighters slowly assist the victim to walk. Fire fighters must coordinate their movements and move slowly.

Performing a Two-Person Chair Carry					
Evaluator Instructions: The candidate shall be provided with a victim to assist, a chair, and a partner.					
Task: Two-person chair carry.					
Performance Outcome: The candidate shall demonstrate the ability to safely chair carry a victim.					
Candidate Directive: "Safely chair carry a victim with a partner."					
No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	Tie the victim's hands together, or have the victim grasp his or her hands together. This prevents the victim from reaching for a stationary object while you are moving him or her. One fire fighter stands behind the seated victim, reaches down, and grasps the back of the chair.				
2.	The fire fighter tilts the chair slightly backward on its rear legs so that the second fire fighter can step back between the legs of the chair and grasp the tips of the chair's front legs. The victim's legs should be between the legs of the chair.				
3.	When both fire fighters are correctly positioned, the fire fighter behind the chair gives the command to lift and walk away. Because the chair carry may force the victim's head forward, watch the victim for airway problems.

Rescuing a Conscious Victim from a Window

Evaluator Instructions: The candidate shall be provided with full personal protective equipment, ladder, and a victim.

Task: Rescuing a victim from a structure.

Performance Outcome: The candidate shall be able to safely remove a victim from a structure.

Candidate Directive: "Safely remove a victim from a structure and down a ladder."

No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	The rescue team places the ladder into the rescue position, with the tip of the ladder just below the windowsill, and secures the ladder in place.				
2.	The first fire fighter climbs the ladder, makes contact with the victim, and climbs inside the window to assist the victim. The fire fighter should make contact as soon as possible to calm the victim and encourage the victim to stay at the window until the rescue can be performed.				
3.	The second fire fighter climbs up to the window, leaving at least one rung available for the victim. When ready, the fire fighter advises the victim to slowly come out onto the ladder, feet first and facing the ladder.				
4.	The second fire fighter forms a semi-circle around the victim, with both hands on the beams of the ladder.				
5.	The second fire fighter and victim proceed slowly down the ladder, one rung at a time, with the fire fighter always staying one rung below the victim. If the victim slips or loses his or her footing, the fire fighter's legs should keep the victim from falling. The fire fighter can take control of the victim at any time by leaning in toward the ladder and squeezing the victim against the ladder. The fire fighter should verbalize each step and talk to the person being rescued to help reassure and calm him or her and encourage the person to keep his or her gaze forward.

Rescuing an Unconscious Victim from a Window					
Evaluator Instructions: The candidate shall be provided with a victim, two partners, ladder, and full personal protective equipment.					
Task: Rescuing an unconscious victim from a window.					
Performance Outcome: The candidate shall demonstrate the ability to safely rescue a victim from a window and down a ladder.					
Candidate Directive: "Safely rescue a victim from a window and down a ladder."					
No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	The rescue team sets up and secures the ladder in rescue position with the tip of the ladder just below the windowsill.				
2.	One fire fighter climbs up the ladder and enters the window to rescue the victim. The second fire fighter climbs up to the window opening and waits for the victim.				
3.	The second fire fighter places both hands on the rungs of the ladder, with one leg straight and the other horizontal to the ground with the knee at an angle of 90 degrees. The foot of the straight leg should be one rung below the foot of the bent leg. When both fire fighters are ready, the first fire fighter passes the victim out through the window and onto the ladder, keeping the victim's back towards the ladder.				
4.	The victim is lowered so that he or she straddles the second fire fighter's leg. The fire fighter's arms should be positioned under the victim's arms, holding on to the rungs. The fire fighter keeps the balls of both feet on the rungs of the ladder to make it easier to move his or her feet. The fire fighter climbs down the ladder slowly, one rung at a time, transferring the victim's weight from one leg to the other. The victim's arms can also be secured around the fire fighter's neck.
