

TECHNICAL RESCUER ROPE LEVEL 1 – NFPA 1006

PRACTICAL SKILLS CHECK SHEETS

Candidate: _____

Successful

Evaluator: _____

Unsuccessful

Date: _____

1006-SKILL-25

Standard:	NFPA 1006, 6.1.1 (B) 2013 edition
Task:	Direct a team in the operation of a simple rope mechanical advantage system in a high-angle raising operation
Performance Outcome:	The movement is controlled, a reset is accomplished, the load can be held in place when needed, operating methods do not stress the system to the point of failure, commands are used to direct the operation, and potential problems are identified, communicated, and managed.
Conditions:	Given rescue personnel, an established rope rescue system incorporating a simple rope mechanical advantage system, a specified minimum travel distance for the load, a load to be moved, and an anchor system
Candidate Directive:	“Direct your team in the operation of the simple rope mechanical advantage system in this high-angle raising operation.”

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1	The team was directed in the operation of a simple rope mechanical advantage system in a high-angle raising operation		
2	The movement was controlled		
3	A reset was accomplished		
4	The load could be held in place when needed		
5	Operating methods did not stress the system to the point of failure		
6	Commands were used to direct the operation		
7	Potential problems were identified, communicated, and managed		

8	The team was directed in the operation of a simple rope mechanical advantage system in a high-angle raising operation		
9	The movement was controlled
