1006-SKILL-26

Standard:	NFPA 1006, 6.1.2 2013 edition
Task:	Direct a lowering operation in a high-angle environment
Performance Outcome:	The movement is controlled, the load can be held in place when needed, operating methods do not stress the system to the point of failure, rope commands are used to direct the operation, and potential problems are identified, communicated, and managed.
Conditions:	Given rescue personnel, an established lowering system, a specified minimum travel distance for the load, and a load to be moved.
Candidate Directive:	“Direct the lowering operation in this high-angle environment”

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1	The lowering operation in a high-angle environment was directed		
2	The movement was controlled		
3	The load could be held in place when needed		
4	Operating methods did not stress the system to the point of failure		
5	Rope commands were used to direct the operation		
6	Potential problems were identified, communicated, and managed
