

TECHNICAL RESCUER ROPE LEVEL 1 – NFPA 1006

PRACTICAL SKILLS CHECK SHEETS

Candidate: _____

Successful

Evaluator: _____

Unsuccessful

Date: _____

1006-SKILL-28

Standard:	NFPA 1006, 6.1.4 2013 edition
Task:	Construct a compound rope mechanical advantage system.
Performance Outcome:	The system constructed accommodates the load and reduces the force required to lift the load, operational interference is factored and minimized, the system is efficient, a system safety check is completed, and the system is connected to an anchor system and the load.
Conditions:	Given a load, an anchor system, life safety rope, carabiners, pulleys, rope grab devices, and rope rescue equipment.
Candidate Directive:	"Construct a compound rope mechanical advantage system."

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1	Compound rope mechanical advantage system was constructed		
2	The system constructed accommodated the load and reduced the force required to lift the load		
3	Operational interference was factored and minimized		
4	The system was efficient		
5	A system safety check was completed		
6	The system was connected to an anchor system and the load
