1006-SKILL-30

Standard:	NFPA 1006, 6.1.6 2013 edition
Task:	Direct the operation of a compound rope mechanical advantage system in a high-angle environment
Performance Outcome:	A system safety check is performed; a reset is accomplished, and the movement is controlled; the load can be held in place when needed; operating methods do not stress the system to the point of failure; operational commands are clearly communicated; and potential problems are identified, communicated, and managed.
Conditions:	Given a rope rescue system incorporating a compound rope mechanical advantage system and a load to be moved
Candidate Directive:	“Direct the operation of the compound rope mechanical advantage system in a high-angle environment”

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1	Operation of a compound rope mechanical advantage system in a high-angle environment was directed		
2	A system safety check was performed		
3	A reset was accomplished, and the movement was controlled		
4	The load could be held in place when needed		
5	Operating methods did not stress the system to the point of failure		
6	Operational commands were clearly communicated		
7	Potential problems were identified, communicated, and managed
