1006-SKILL-37

Standard:	NFPA 1006, 6.2.5 2013 edition
Task:	Direct a team in the construction of a system intended to move a suspended rescue load along a horizontal path to avoid an obstacle.
Performance Outcome:	Personnel assignments are made and clearly communicated; the system constructed can accommodate the load; tension applied within the system will not exceed the rated capacity of any of its components' parts; a system safety check is performed; movement on the load is efficient; and loads can be held in place or moved with minimal effort over the required distance.
Conditions:	Given rescue personnel, life safety rope, rope rescue equipment, and a suitable anchor capable of supporting the load.
Candidate Directive:	"Direct a team in the construction of a system intended to move a suspended rescue load along a horizontal path to avoid an obstacle"

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1	Directed a team in the construction of a system intended to move a suspended rescue load along a horizontal path to avoid an obstacle		
2	Personnel assignments were made and clearly communicated		
3	The system constructed could accommodate the load		
4	Tension applied within the system did not exceed the rated capacity of any of its components' parts		
5	A system safety check was performed		
6	Movement on the load was efficient		
7	Loads could be held in place or moved with minimal effort over the required distance
