**1006-SKILL-38**

<b>Standard:</b>	NFPA 1006, 6.2.6 2013 edition
<b>Task:</b>	Direct a team in the operation of a rope system to move a suspended rescue load along a horizontal path
<b>Performance Outcome:</b>	The movement is controlled; the load is held in place when needed; operating methods do not stress the system to the point of failure; personnel assignments are made; tasks are communicated; and potential problems are identified, communicated and managed.
<b>Conditions:</b>	Rescue personnel, an established system, a target for the load, a load to be moved, and personal protective equipment.
<b>Candidate Directive:</b>	“Direct a team in the operation of a rope system to move a suspended rescue load along a horizontal path”

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1	Directed a team in the operation of a rope system to move a suspended rescue load along a horizontal path
